

Science  
Board  
Games for  
the Year!

# Struggling to find a hands-on way to review science skills?

Don't spend any more time planning, searching, or brainstorming. Everything you need is in this easy to use download!

# Student Directions and Teacher Tips

## Teacher Tips

- Read the directions to the students and model how to play.
- Be prepared with dice/spinner and game pieces for each player (paperclips, pencil top erasers, pieces from another game, etc.)
- Every student should solve every problem - not just the person who

## DIRECTIONS

You'll need a dice or a spinner for each game board and a game piece for each player.

The person whose name comes first in alphabetical order will play first in the game. Roll the die and move that number of spaces on the game board. Each person will answer the problem on their own recording sheet. Everyone will double check their answers with each other. If you have the same correct answers, the next person should roll the die. If you have different answers, discuss with the other players. Use your textbook, notes, charts, etc. to help prove your answer. Then the next player may go.

\*If you land on a space with an arrow, you must solve a problem before moving to the next space. If you solve it early, play the game again.

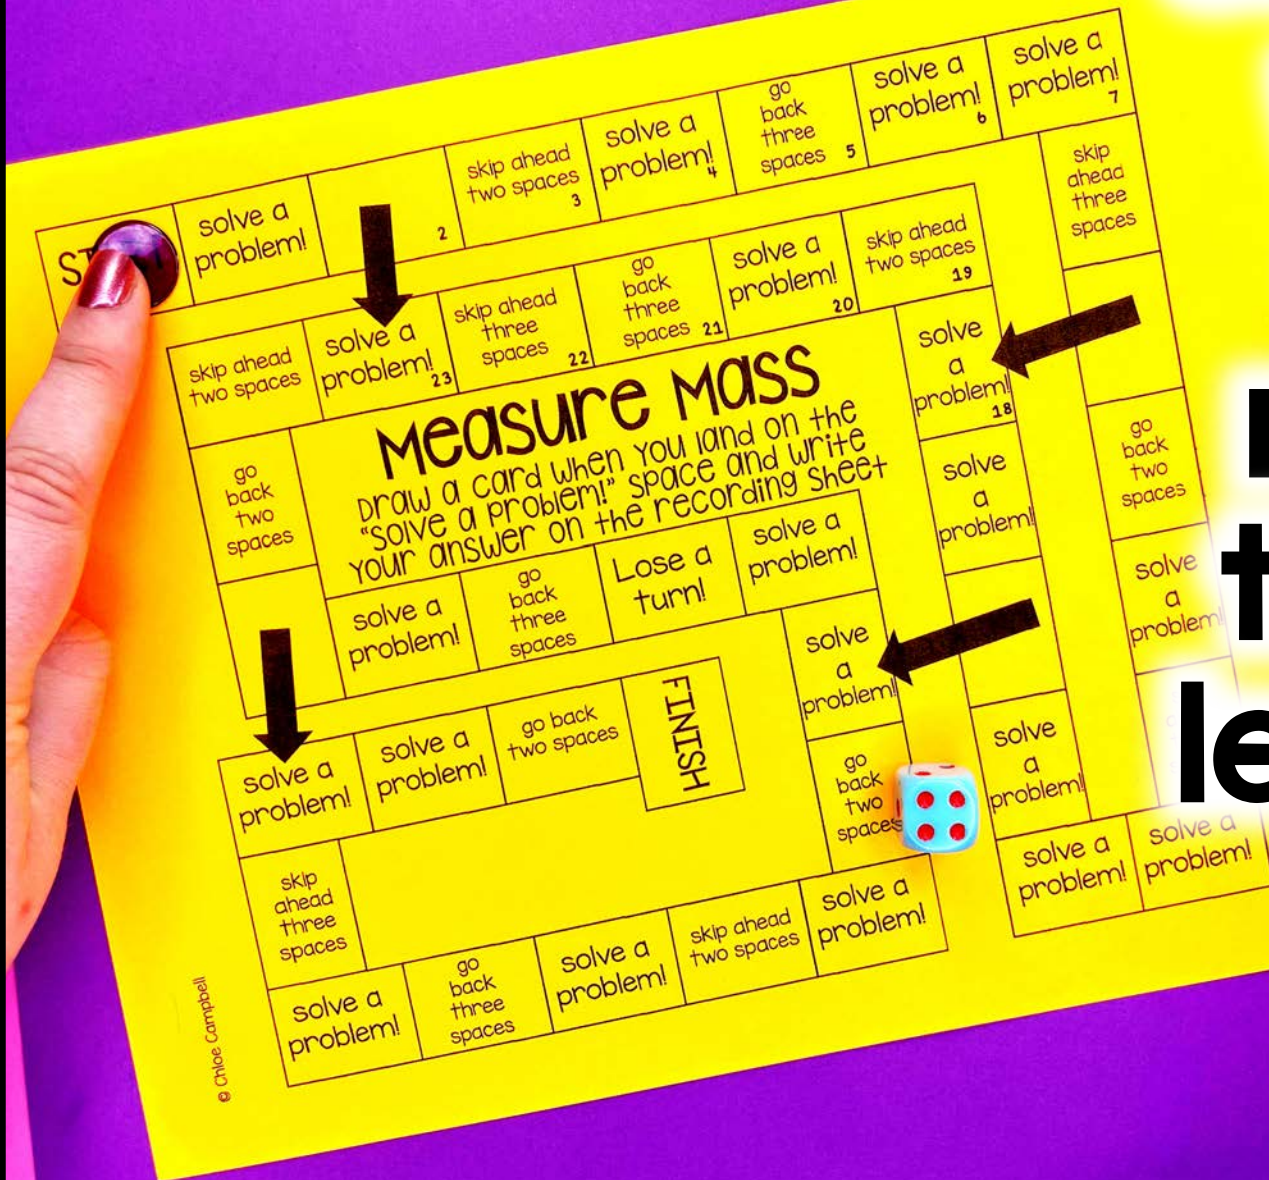

# What's the best way to use these games?

- Science Centers or Stations
- Whole Group Practice
- Morning Work
- Early Finisher Activities
- Substitutes
- Send home to engage students' families
- Test Prep or End of Unit Review

# Students won't even realize they're learning!

# Topics in this download:

- Galaxies and Solar System
- Solids, Liquids, or Gases?
- Physical and Chemical Changes
- Forms of Energy
- Weather
- Measure Mass
- Measure Volume
- Water Cycle
- Natural Disasters
- Nature of Science
- Conductors and Insulators
- Human Body
- Plant and Animal Adaptations
- Force and Motion
- Control Group vs. Experimental Group
- Experiment vs. Investigation
- Opinion vs. Observation
- Will it Dissolve in Water?
- Renewable and Non-Renewable Resources
- Rocks and Minerals

# every game!

## Solids, Liquids, or Gases Question Cards

1 What takes the shape of its container?	2 Is ice a solid liquid or gas?	3 What becomes a gas when it is evaporated?
5 What does a liquid become when it evaporates?	6 What freezes and becomes a solid?	7 Is freezing water a solid, liquid, or gas?
		8 Is rain a solid, liquid, or gas?

## Physical and Chemical Changes Question Cards

1 Is cutting hair a physical or chemical change?	2 Is rusting a physical or chemical change?	3 Is baking cookies a physical or chemical change?	4 Is food spoiling a physical or chemical change?
5 Is melting ice a physical or chemical change?	6 Is adding food coloring a physical or chemical change?	7 Is a firework a physical or chemical change?	8 Is breaking glass a physical or chemical change?
9 Is sugar dissolving in water a physical or chemical change?	10 Is roasting a marshmallow a physical or chemical change?	11 Is frying chicken a physical or chemical change?	12 Is drawing with chalk a physical or chemical change?
13 Is popping popcorn a physical or chemical change?	14 Is blending a smoothie a physical or chemical change?	15 Is dissolving salt a physical or chemical change?	16 Is a rotting banana a physical or chemical change?
17 Is digesting food a physical or chemical change?	18 Is melting cheese a physical or chemical change?	19 Is breathing a physical or chemical change?

**Easy way to  
hold students  
accountable**

## Teachers Like You Have Said:

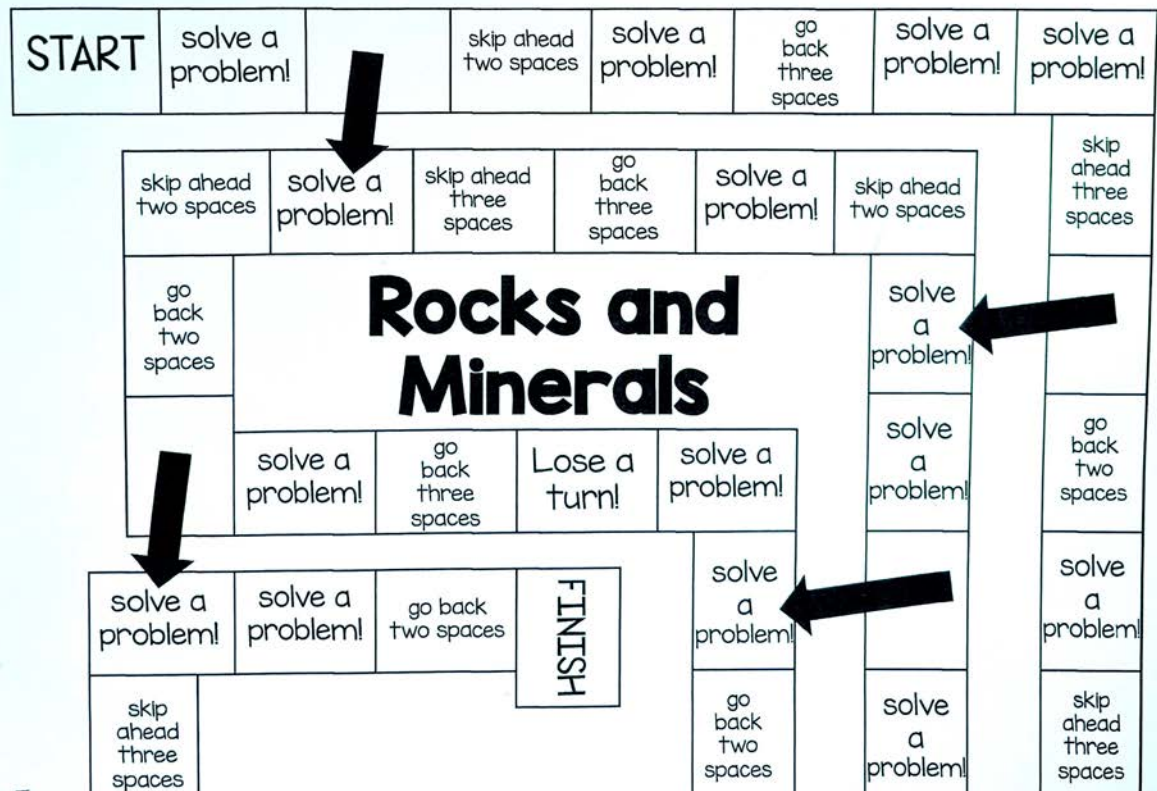

“What a way to engage students!”

“My kids love these!”

“Great product. Love hands-on learning!”

“Easy to use, my students enjoyed this  
resource!”

Just add  
game  
pieces  
and a  
dice to  
play!
