Hold students accountable
with recording sheets

Directions

You'll need a dice or a spinner for each game board and a game piece for each player.

The person whose name comes first in alphabetical order will play first in the game. Roll the die and move that number of spaces on the game board. Each person will solve the problem on their own recording sheet.

Everyone will double check their answers with each other. If you have the same correct answers, the next person should roll the die. If you have different answers, discuss it with your team. Find a mistake in your work or try to solve the problem again, then the next player may go.

*If you land on a space with an arrow, you must solve the problem before moving to the next space.

*If you finish early, play the game again.

Are you tired of spending time
looking for standards based
activities for your math class?

Save yourself time and energy with these
board games that are already aligned to
your standards, include an answer key for
quick grading, and are sure to keep your
students engaged during math practice
time!
