Students create a matching word problem.

The image shows a worksheet titled "Create a Matching Word Problem" with a winter theme. At the top, there is a blue header with the title and a line for the student's name. Below the title, the directions are: "Directions: Use the numbers from the cards to write your own matching word problem." The worksheet features a list of winter items, each with a corresponding line drawing: a snowman, ice skates, a snow globe, a beanie, a mitten, a mug of hot chocolate, a moose, a scarf, a snow shovel, and a snowman. To the right of this list is a large blue box with the same title and directions, and a line for the student's name. Below the blue box is a large blue pen. The worksheet is decorated with several snowflakes, including two large blue and white ones at the top right and two smaller blue and white ones at the bottom left. The copyright notice "© Chloe Campbell" is visible in the bottom right corner.

How to Use:

1. Print out each page. You can print on cardstock and/or laminate to help the cards last longer.
2. Cut out each card. There are 4 to a page.
3. Place the cards around the room or tape the cards to the walls, back of student chairs, doorways, etc.
4. Give students a clipboard. They'll walk around the room to find the cards.
5. Students will find the card that matches each shape. They'll solve the problem then write the answer in the box that matches the shape.

Students are up and moving around the room while solving math problems. That's a WIN!
