to take a look inside!

# 20 Problems Included:

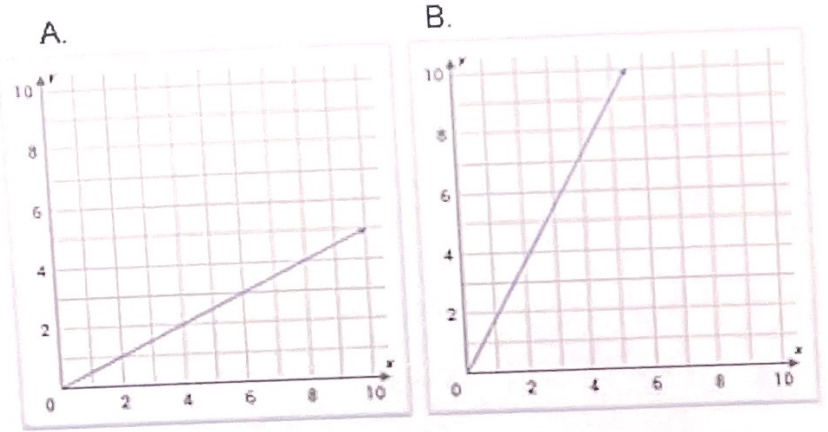

10  
Which table shows a proportional relationship between  $x$  and  $y$ . Yellow, Green or Both.

$x$	$y$		$x$	$y$
1	3		2	5
3	9		4	10
6	18		6	15

12

Are the ratios 2:1 and 14:7 equivalent?

11  
Which graph shows a relationship between  $x$  and  $y$ ? A, B, or Both.

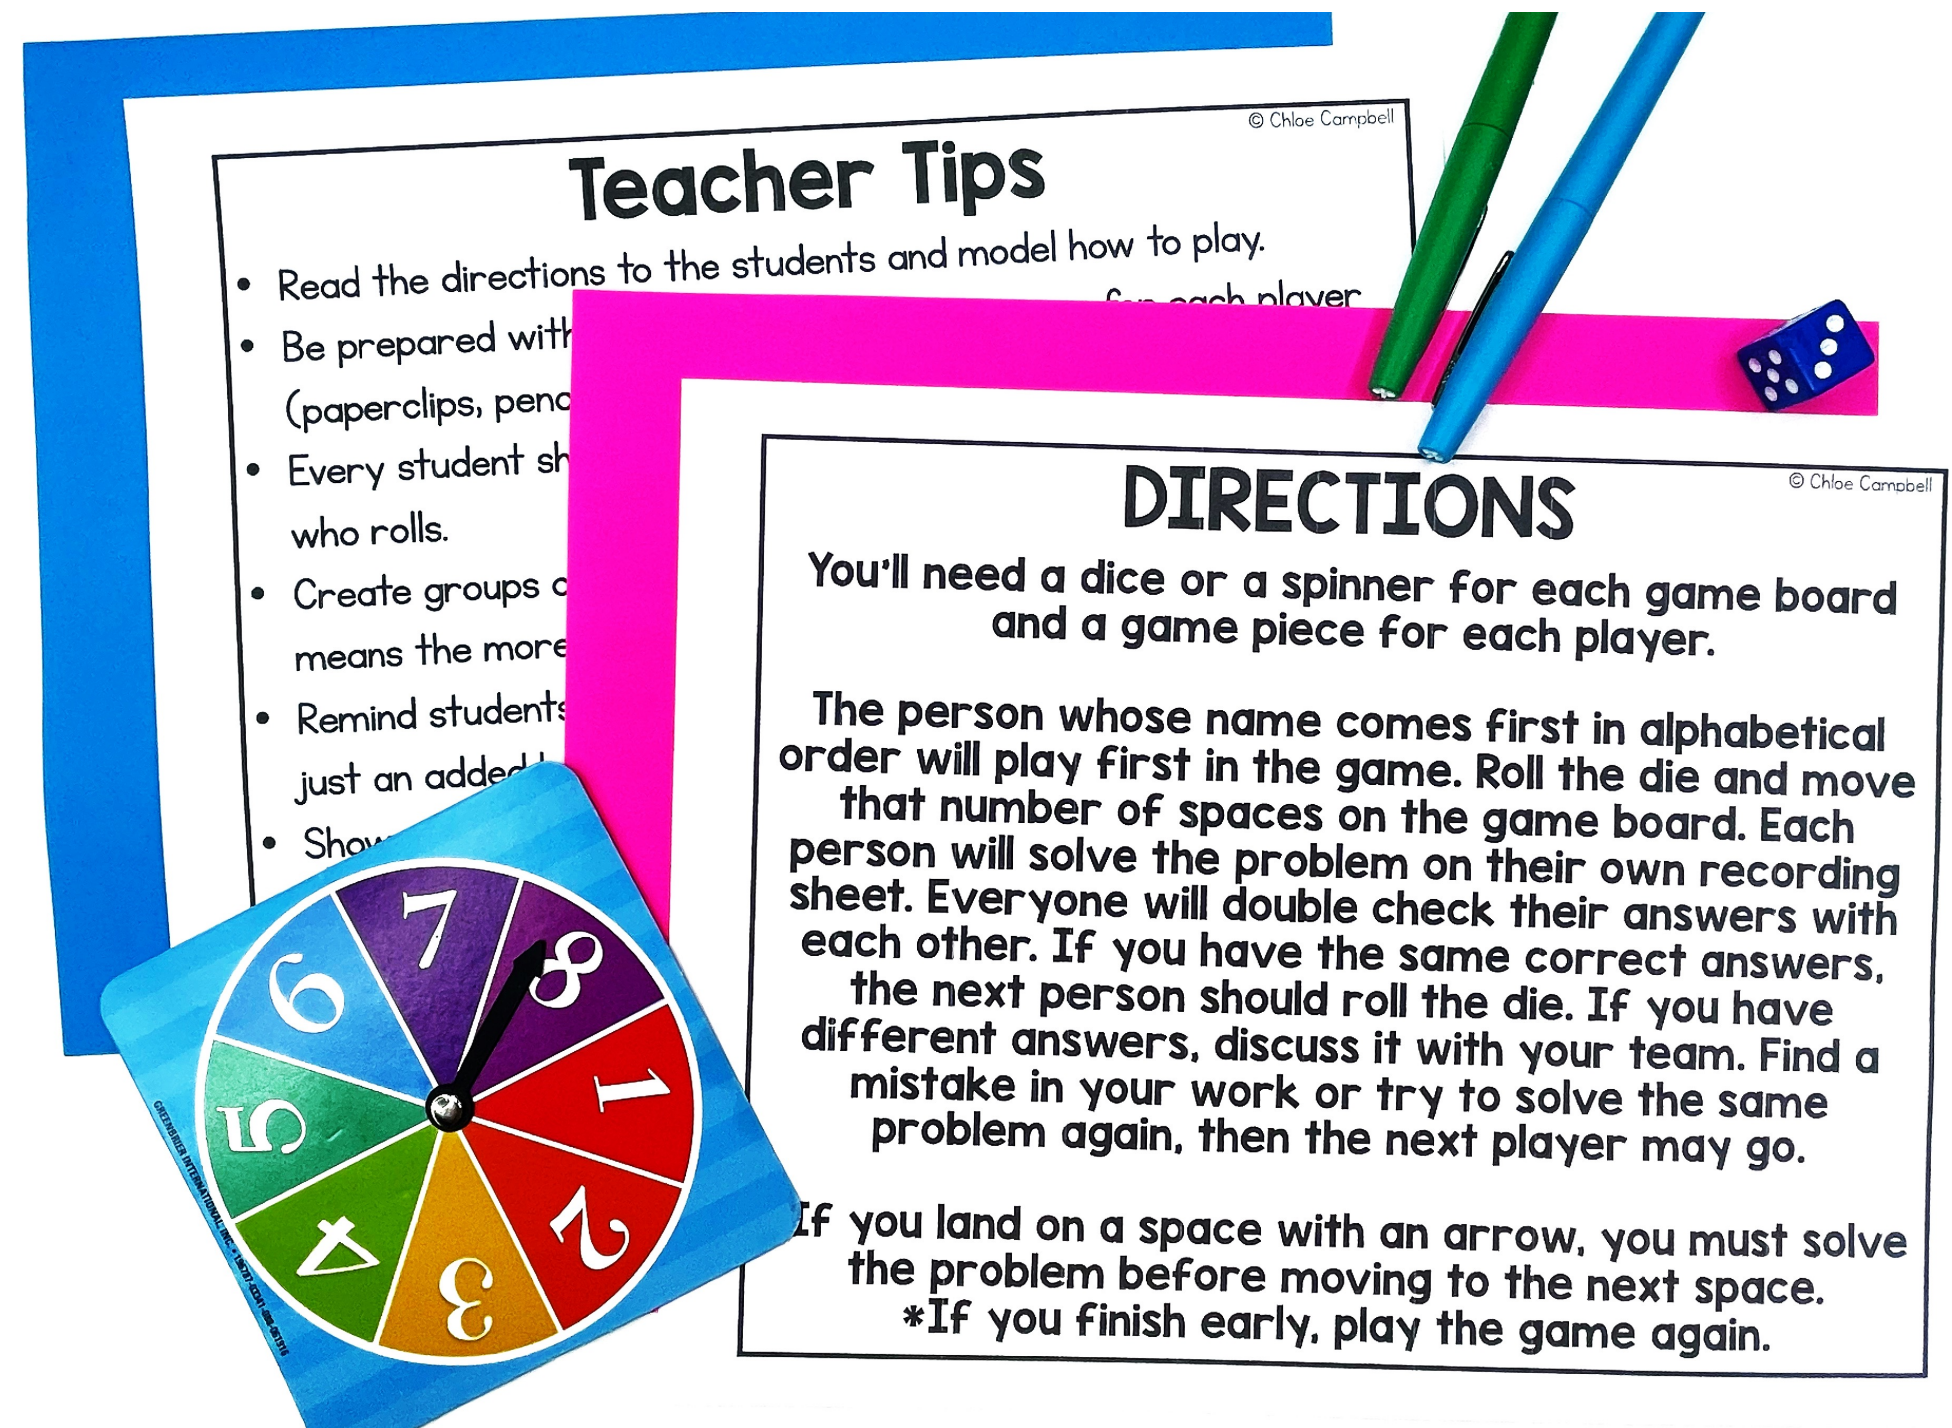

9

Are the ratios 1:2 and 8:16 equivalent?

# Student Recording Sheet

Name \_\_\_\_\_ **Ratios & Proportions Recording Sheet**

1 Yellow	2 Both	3 No	4 Both
5 B	6 Yes	7 Green	8 A
9	10	11	12
13	14	15	16
17	18	19	20

# HAPPY TEACHERS SAID...

“ This was a hit during centers. All students were engaged, and better yet – learning! Love this! ”

“ My students love playing games and a simple, easy prep game like this is a great addition to math centers, early finisher activities, and review days. ”

“ These are great for small group stations! What a fun task card adaptation. Students get to play a fun and competitive board game, but they also get to practice learning. Plus, the recording sheet makes it easy to grade and monitor student progress; they aren't just playing they are actively learning and participating with evidence of ability. Great resource! ”

# What's the Best Way to Use this Game?

- ✓ Math Centers or Stations
  - ✓ Whole Group Practice
    - ✓ Morning Work
    - ✓ Partner Activity
    - ✓ Early Finisher Tasks
      - ✓ Substitutes

# Tips for Playing Math Games:

- ★ Read the directions to the students and model how to play.
- ★ Be prepared with dice/spinner and game pieces for each player (paperclips, pencil top erasers, pieces from another game, etc.)
- ★ Every student should solve every problem – not just the person who rolls.
- ★ Create groups of 2-4 students. The lower number of students means the more focused students are while playing.

# Tips for Playing Math Games:

- ★ Remind students that the focus is not playing the game...that's just an added bonus! The focus should be on practicing the math skills.
- ★ Show students how to compare and discuss answers. Did you both get the same answer? If students get different answers, ask them to solve the problem using a different strategy or help coach each other through the problem.

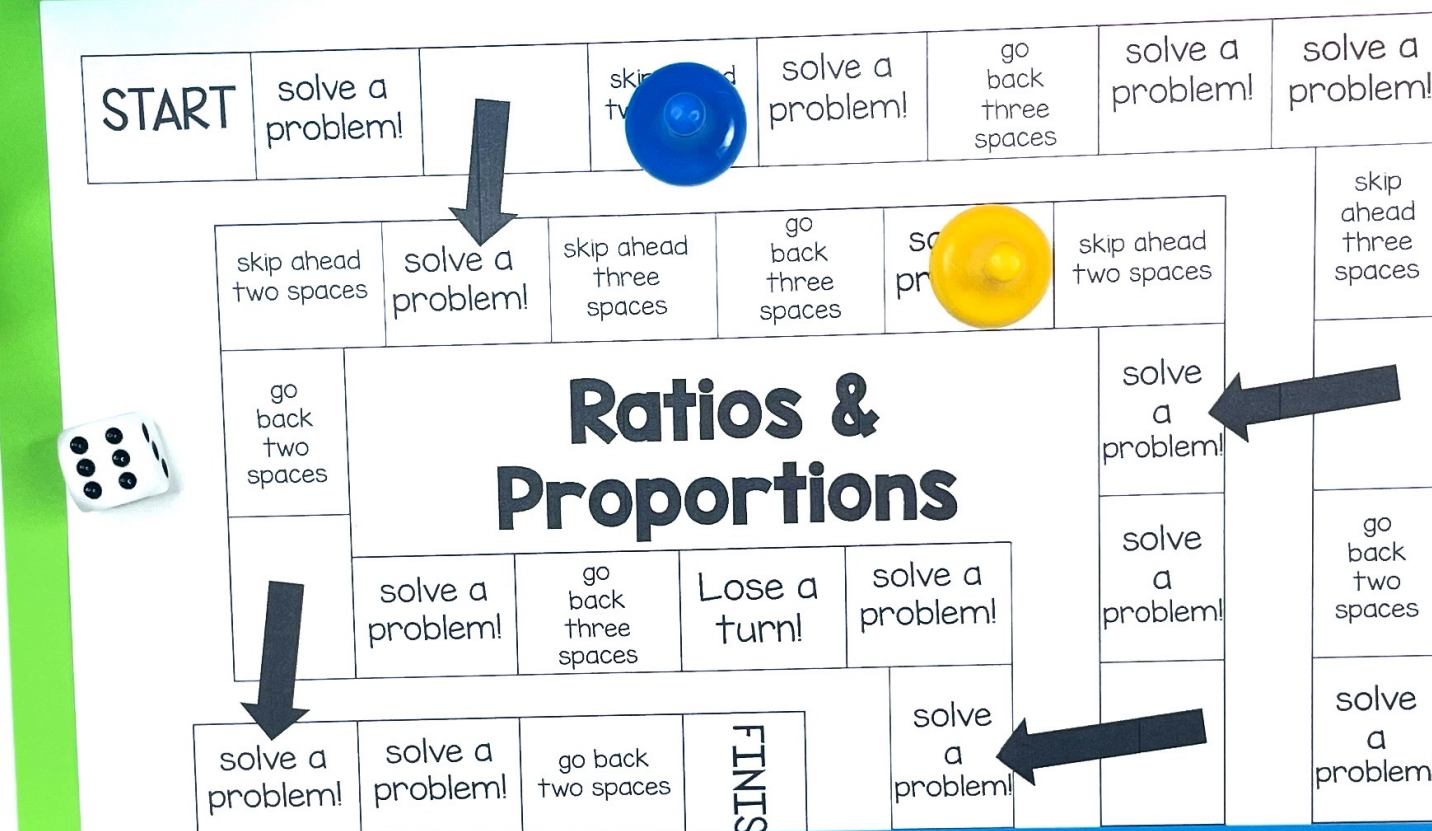

# Why Board Games?

Research shows that  
challenge-based gamification in  
the classroom lead to an increase  
of 34.755% in student performance

(ScienceDirect, 2020).

Students  
won't  
even  
realize  
they are  
learning!
